

Social Vulnerability & Flood Exposure — White Rock Creek

Census Block Group SVI vs 100-Year Floodplain

Legend

Social Vulnerability Index

Low Vulnerability

Moderate Vulnerability

High Vulnerability

White Rock Lake Watershed

White Rock Lake

100yr Flood Extent

Social Vulnerability & Flood Exposure

Metric	Value
Watershed population (2024)	508,251
Population exposed (100-yr)	69,913 (13.8%)
High-vulnerability block groups	exposed > 10% area
-> count flooded	8 block groups

Social Vulnerability Index (SVI):

Low

Moderate

High

Key finding: 8 high-vulnerability block groups have over 10% of their area within the 100-year floodplain -- disproportionate flood exposure among socially vulnerable populations.
